

CASA REMOTE PILOTS LICENCE

A full-page background image showing a worker in a white hard hat and a high-visibility yellow vest standing in front of a white wind turbine tower. The worker is looking up towards a small drone flying in the clear blue sky. The sun is low on the horizon, creating a bright lens flare effect behind the worker's head. The overall scene is set in an open field with other wind turbines visible in the distance.

up**

What does this course involve?

The **CASA Pilot Conversion Course** is a streamlined program for pilots that have a CASA Part 61 Flight Crew Licence to obtain their CASA RePL (Remote Pilot Licence). This course will be delivered by our team of experienced instructors and will recognise your prior aviation experience and knowledge, focusing the theory on RPAS related material. You will then complete at least 5 hours of operational flying on some of the latest RPAS equipment in the industry.

What will I study?

As part of the conversion course, we will build on your existing aviation knowledge and experience tailoring the theory components to RPAS specific content. Whilst it is not a CASA requirement to cover theory as part of a conversion course, we believe it is important to assist you in gaining the required skills and knowledge to succeed in the commercial drone industry once you have obtained your RePL. You will learn subjects such as:

- RePL Air Law
- ReOC Legislation
- Standard Operating Conditions
- RPAS Electrical Systems and Components

In addition to these theory elements, you will also spend at least 5 hours operating a number of drones under our instruction and guidance, ensuring you can complete the minimum manoeuvres required to gain your RePL while also giving you the skills to operate safely and efficiently in the drone industry.

Who is this course for?

This course has been tailored to anyone who holds a CASA Part 61 Flight Crew Licence. We will assist you in growing your aviation knowledge and applying that to the commercial drone industry. On completion of the conversion course you will not only obtain your CASA RePL, you will have gained the knowledge and skills to excel in your career as a commercial drone pilot.

Why study with us?

At UAV Training Australia, we pride ourselves on going above and beyond to ensure our students not only meet the CASA standards and requirements for an RePL, we also ensure you develop the skills and knowledge to succeed as a commercial drone pilot in this growing industry. Our instructors have a wealth of aviation knowledge and experience in both teaching and real world RPAS operations, ensuring you are trained to the highest of standards.
