

A yellow quadcopter drone is shown stuck to a brown tree branch. The drone's four propellers are visible, with two being white and two being black. The background is a clear blue sky with some blurred brown leaves.

# Intro to Drones Course

Don't get  
left hanging

## What is the Intro to Drones course?

The **Introduction to Drone's** course is your first step into this exciting industry. This introductory course will give you the skills and knowledge to safely and legally operate a drone whether you intend to fly for fun or become a licenced drone pilot. The course will be delivered from one of our qualified CASA instructors ensuring you are trained to the highest of standards and gain valuable experiences forming the foundation to take with you for the rest of your drone career.

## What will I learn?

The Introduction to Drone's course will take you through the basics of the industry and ensure you develop the knowledge to safely operate and fly a drone whether it be for fun or to earn an income. We will discuss topics such as:

- How to safely fly a drone
- Where you can operate a drone
- How to look after your drone
- Air Laws impacting drone operations
- How to earn an income with a drone

Once we've covered the theory elements, the fun really begins! You will spend time with one of our CASA instructors teaching you how to fly a number of our aircraft. This hands on experience will develop your situational awareness and ability to safely fly a drone. The time you spend flying will even be recorded in your logbook and can be used to assist in gaining a Remote Pilots Licence in the future.

## What will I fly?

We will initially develop your skills and flying techniques on one of our Mavic Mini's. These micro drones are fantastic to learn on and provide an excellent foundation to develop your hands on skills. Once you've developed a foundation, we will continue to expand on your abilities by moving to a larger drone, the Mavic Pro. The Mavic Pro is one of the most common drones in the industry and is an excellent training device. Both of these drone's will be a great addition to your pilot logbook.
